

Why grids?

Draw and paint like the professionals! Used by Leonardo Da Vinci and other masters of art to draw and paint with remarkable results, gridding is a technique that helps anyone, regardless of artistic ability, conquer the difficult task of drawing and painting with accurate perspective and shape. Historically, gridding was complex due to math requirements, but we've designed an easy to use gridding system that can be used by anyone regardless of skill to obtain lifelike results in drawing and painting. Gridding is the Artists' secret to accurate perspective and shape.
